

PALLET COVER

Pallet covers, also known as pallet wraps or pallet shrouds, are a type of protective packaging material used to secure and protect items on a pallet during storage and transportation. Pallet covers come in a variety of sizes and can be used in a range of industries.

Characteristics

- It is produced from Recyclable LDPE material with Coex technology.
- UV protection and Antistatic additives can be applied.
- It can be produced in the desired color.
- It is used in automatic and or manual palletizing lines. It isolates your products on the pallet from the external environment.
- During application, it needs naked flame and or heat.
- It provides optimum protection against dust, dirt and moisture and is also ideal for outdoor storage.
- High tear puncture resistance, high holding force ensures stable load securing throughout the entire logistics chain, from loading and transport to the end-user.
- Appropriate film thickness -from 80 to 200 microns - and recipe are prepared according to the weight of the palletized product and the special requirements of the customer.

Usage

Pallet cover is generally used by companies producing construction materials. It is suitable for use in products such as:

- **construction chemicals and cement**
- **ceramics**
- **raw materials**
- **glass**
- **thermo-sensitive products**
- **etc...**
