

# BAGS

**Bags** are produced in various sizes and thicknesses for all sectors with different raw materials and production methods according to the usage area.

## Characteristics

- Plastic bags can be tailor-made from HDPE or LDPE.
- Versatility of Clear Plastic Bags in Retail and Industrial Packaging
- Plastic bags are among the most widely used and cost-effective forms of packaging in the industry.
- Certain additives can be added such as Ethyl Vinyl Acetate (EVA), which is great for freezer use, UV inhibitors, or anti-static poly bags that are commonly used in the electronics industry.
- Plastic bags can be made with a low or high slip feature.
- Low slip bags provide an easy grip, while high slip bags offer a smooth slide for effortless handling during the packing process.

## Usage

Plastic bags are a ubiquitous part of our lives. They are used for everything from carrying groceries to storing food to lining trash cans

- **Retail Shopping Bags**
- **Grocery Bags**
